CARLOS CEJA
Design Program Manager

San Jose, CA | carlosceja27@gmail.com | linkedin.com/in/carlos-s-ceja | github.com/carlosceja27

Program lead bridging organizational change management and AI-native tooling. Shipped one full design org transformation at Workday; bringing 200+ designers, researchers, and PMs to a shared way of working through qualitative methods, automating reporting via Jira, Airtable, Asana, and Smartsheet, and through human alignment work. Authors agents and workflow tools across quantitative research, OSINT, and learning. Best at the hard problem of any transformation: driving adoption.

✦ AI Agents

Quantitative
Published on Github

Statistical analysis agent for survey data; audits datasets, runs assumption-checked tests (t-tests, ANOVA, regression, mediation), and produces APA-formatted research reports.

Journalist
Published on Github

Composable agent for working journalists: research, OSINT collection, source identification, AP-style enforcement, and revision support. Supported reporting for "Better Thinkers or Better Submitters?" (The Santa Clara, April 2026).

Tutor
Published on Github

Evidence-based tutoring agent grounded in cognitive science research; applies retrieval practice, spaced repetition, and adaptive questioning across any subject.

Experience

Workday — UX Program Manager — *Pleasanton, CA* — Feb 2020 | May 2025

Embedded with design leadership across Financial & Professional Services UX — 24 Designers, 9 Researchers, 5 Product Managers, 6 Engineering-partnered Scrum Teams.

- Established Workday's first UX Community of Practice across 200+ practitioners and 7 product pillars, building program structure from listening sessions with ICs, managers, and design leadership; enabled executive-level visibility into staffing and prioritization across the org.
- Architected an automation layer across Jira, Confluence, and Asana for 140+ designers, raising executive project visibility from <10% to 99%+ — surfaced cross-pillar workload imbalances that informed staffing and prioritization decisions.
- Designed and shipped a Research Impact Tracker in Airtable to evaluate insight quality across the Financials org; piloted with 4 cohorts of researchers (junior to principal) before propagating org-wide as a model.
- Drove org-wide adoption of a shared design lifecycle and taxonomy across 120+ designers through education sessions and 1:1 coaching, standardizing handoffs across product, design, and engineering.

U.S. Army — Logistics Analyst — *Fort Bragg, NC* — Jun 2015 | Nov 2019

- Led organization-wide migration from paper-based workflows to SAP enterprise systems for a 27-person special operations company; designed training, tracked adoption, and documented procedures through full rollout, achieving 100% digital adoption.
- Maintained 100% accountability of a $20M+ asset portfolio across U.S., Europe, and Africa as the sole supply manager, with zero loss or security incidents across multiple deployments.

Education

Santa Clara University — *Santa Clara, CA*

M.S. Business Analytics Candidate (Incoming) — Mar 2027 | Jun 2028
Expected

Emphasis in AI and Machine Learning

B.A. Communication | GPA 3.5 — Sep 2024 | Mar 2027

Emphasis in Professional, Business, and Organizational Communication
Lambda Pi Eta Communication Honors Society · Inducted May 2026
Relevant Coursework/Skills: Python, Quantitative Methods, Qualitative Methods, Organizational Communication, Advanced Journalism

Skills

Program Management
- Workflow Transformation
- Design Operations
- Change Management
- Stakeholder Alignment
- OKR Tracking
- Agile & Scrum
- Risk Mitigation

Artificial Intelligence
- Localized AI Deployment
- Agent Design
- Skill Design
- MCP Design
- Prompt Engineering
- Python

Certifications
- Advanced Scrum Master (ACSM)
- Certified Scrum Product Owner (CSPO)
- Google AI Essentials & Prompt Engineering
